About the ebooks

Refounding Political Governance: The Metaphysics of Public Administration points to a possible paradigm shift in the way Anglo-American Public Administration should be understood and analyzed. The book presents a unique approach to the analysis of power, leadership and management in Public Administration. The central theme is that humans make organizations in their own image and these organizations, in turn, are a product of the way humans think and act.

Refounding Corporate Governance: The Metaphysics of Corporate Leadership is a deconstructive tour-de-force and leads the reader to an understanding of the further evolution of corporate governance in considered ways and brings them together in a coherent and understandable way. This book looks at the role of the individual in the organization and allows readers to reflect on their own role and interaction within their organization. It focuses particularly on leaders, managers and corporate board members and on how power and leadership in the corporation are operating now.
