This session is **FREE**

In the discipline of health service management, the causes and consequences of overwork and fatigue are well-documented, given their impacts on patients, organisations, and healthcare professionals.

To better understand overwork and fatigue, and how to address them, this event will showcase three initiatives, followed by a panel discussion with experts in these areas.

The first is a study in which fatigue, recovery, and cortisol levels were examined among nurses in an emergency department. The second is a study about junior doctors' concerns about working conditions and their inability to voice these concerns. The third is an initiative to proactively engage with junior doctors, as well as listen to and address their working conditions.

Don't miss your opportunity to learn how to optimise the wellbeing of healthcare professionals.

# 20th ANZAM Operations, Supply Chain and Services Management Symposium – 2023

**Starts** – 25 September 2023 at 8:30 am

**Ends** – 26 September 2023 at 5:00 pm

**Venue:** Level 8, Building 8, UTS Business School, Platform 14/28 Ultimo Rd, Ultimo NSW 2007

## Managing Turbulence and Performance in Operations & Supply Chains Through Digital Transformation

The 20th ANZAM Operations, Supply Chain and Services Management Symposium is hosted by The UTS Business School, University of Technology Sydney.

The Symposium theme for 2023 is “Managing Turbulence and Performance in Operations & Supply Chains Through Digital Transformation.”

Supply chain disruptions are inevitable and ever increasing. Ensuring supply chain continuity and managing performance during turbulent times is critical for organizations. Digital transformation of supply chain operations has become a powerful tool to enable supply chains to be resilient and sustainable against turbulence while maintaining performance. Numerous digital solutions such as information integration in supply chain, blockchain, big data analytics, artificial intelligence, robotics, the Internet of Things, and other advanced technologies enable organizations to identify problems and opportunities, seize opportunities, reconfigure resources and transform organizational capabilities and supply chain operations to manage and enhance performance. However, developing operational excellence and driving superior performance through digital transformation requires selecting the right strategies, implementing well thought out plans and building the right capabilities, all of which require sound organizational changes and leadership. This Symposium seeks to develop links between theory and practice, and will provide a platform for academics, industry partners, research students, and other practitioners to share novel empirical and modelling approaches for **Managing Turbulence and Performance in Operations & Supply Chains Through Digital Transformation**.

**Organized by Management Department- UTS Business School.**

### **Key Note Speaker: Tava Olsen**

Tava is an award-winning expert in operations and supply chain management, with a PhD from Stanford University and extensive experience publishing in Financial Times Top 50 journals.

Tava has edited several top academic journals including Operations Research (Area Editor for Operations and Supply Chain), Production and Operations Management (Senior Editor), Management Science (Associate Editor) and Manufacturing and Service Operations Management (Associate Editor).

### **Industry Speaker**

Mr. Pu Yun – Chief Technology Officer, Agree Technology Co., Ltd

Pu Yen is an accomplished expert in technology leadership, with expertise in banking systems, financial technology, software engineering and system/system platform development. With a 20 year track record encompassing hundreds of IT and IS projects after graduating from Tsinghua University, he adeptly orchestrated, led, guided, managed and supervised ventures across diverse financial institutions, ranging from prominent large Chinese national banks to agile dynamic small scale financial institutions. Currently, Pu Tun is leading the research and development operations of Agree

Technology, a FinTech end to end service provider (IDC accredited leader in banking channel solutions in China).

**Presentation topic:** 'Air Banking: A Practice of Innovative Digital Transformation, Operations and Service Management Excellence in Banking'

Mr Jack Junjie Cai – Managing Partner of Consulting Service, Agree Technology Co., Ltd  
Jack Junjie Cai is a senior advisor in the topic of operation excellence, digital transformation and sustainable growth strategy. He works closely with executives from China, Hong Kong, Japan and Europe. Jack started his career as a strategy manager at a Fortune 500 company before he devoted himself to management consulting at KPMG Consulting (NASDAQ/NYSE listed), Capgemini (CAC40 listed) and ShineWing Group (IAB ranked 21). Jack is currently leading the strategy and transformation consulting practice of Agree Technology, a FinTech end to end service provider (IDC accredited leader in banking channel solutions in China).
