

January 2026 Newsletter

Journal of Management & Organization

Hello,

Welcome to the January newsletter of the Journal of Management & Organization. We are a quartile 1 Scopus indexed journal indicating that we are in the highest quality quartile with our journal being published by Cambridge University Press in partnership with the Australian and New Zealand Academy of Management.

I hope everyone had a good Christmas and wishing you all a Happy New Year. Here in Australia and New Zealand it is summertime so a time for many to watch cricket, tennis and go to the beach.

We have had a large number of submissions for the 30th birthday special journal issue on systematic literature reviews, bibliometrics and meta-analyses. The portal is now closed and the special issue is expected to be published in issue 2 of this year. This cements our objectives of publishing in a fast way but with quality reviews novel and interesting topics. We still welcome review type of articles for regular issues of the journal.

In 2026 everything in the journal is published as open access. This usually means there are higher citations and research is available for everyone to read. This will increase our readership in terms of downloads and will be linked to increased visibility for all.

We get many questions about the usage of artificial intelligence with policy being continually updated. Thus, it is important to check our website about any kind of topics related to artificial intelligence usage as well as general publishing ethics advice:
